Money flow for the future world and community organization guidelines

0.)
Murdering yourself is not allowed and takes you to eternal hellfire (most probably). If Israel stops all occupation of Palestine (Gaza and West Coast), it would be allowed for up to 15% of West Coast population to be jews, otherwise whole Palestine would be completely a muslim country and Israel would be risking to lose even more territory.

1.)
Currently people are forced to take money from each other. That causes smaller businesses to close very fast, and causes people to focus only on widely needed jobs and services. That is not necessary, so why don't we create a system where noone would take money from anyone? By applying these guidelines we can do exactly that.

2.)
Since noone is able to take money from anyone, when you pay for something your money just disappears (it is not transferred into anyone's pocket, because there is no need for it). Companies would not own any money, but they would just pay salaries to their employees. There would be no inflation, because every cent would have expiration date 6 months. People would still need to pay for food, drinks (except of water), electricity, highways, hotels, different services and many other things. Water will be free.

3.)
Since there is no way to give money to anyone, a question arises: how would muslims pay zekat? The answer to that question is, we would have to work 1 month per year in food production and that would be counted as zekat.

4.)
Artificial intelligence and nanotechnology would be banned in the future world! Software and hardware production would be tightly controlled, and all of us would make sure that weapons are not developed at all. Every job that can be automated (without AI and nanobots) would and should be automated. People would not be forced to work just for the sake of working, because that is useless and we should spend our time in a better way: praying to the One and Only God, spending time with our families or working on something that is really needed.

5.)
People will need to pass entry exam(s) to be allowed to work some (or all) jobs. Region/town leaders will decide which jobs need such exams, and also content of those exams. Kinds of allowed jobs will be same in the whole world. That is what we call 'companies', and they would be global. All of them will follow strict basic rules: no artificial intelligence allowed like neural networks, deep learning, too much optimization etc, and no nanotechnology. During education most of people will not learn about such things, however leaders will be informed about them and about those rules, and they will know that part of their mission is to make it impossible to develope such technologies, because in the end it has been proven that they are too dangerous. We vote for simplicity in technology, so we will attempt to simplify SW and HW products as much as possible. In general, weapons production and use of them is not allowed, only weapons such as knifes, bats (bosanski: palice) and some chemical irritants will be allowed.

6.)
List of jobs would be published regularly by town leaders, and people would have to work 6 up to 11 months per year (the rest of time would be counted as PTO - paid time off) and they would work for salaries. Possible salary ranges for jobs would be agreed at the level of the whole world. Within towns the number of working months and salaries would be regulated in such a way so that jobs that are more needed provide better conditions. You would not have to work to survive (you would still receive some money in your account), but in that case you would be poor.

7.)
Both: lunar (bosanski: hidžretski kalendar) and Gregorian calendar will be used.

8.)
People would not own any flats, because you can not be at more than 1 place at the same time. You could exchange flat with someone else, or enter some flat that is available and not taken at the moment.

9.)
The whole world would be divided into regions, and each region into towns. There would be no region larger than Bosnia and Herzegovina: 51209 km^2. Countries that are smaller would be considered as regions. Countries that are larger would be split into as many regions as whole Bosnia and Herzegovina countries would fit into them, plus 1 because of remainder in division. The total number of people in the world would be kept around 8 billion, according to transparent rules that are explained somewhere below.

10.)
At hotels people would be able to stay up to 21 days maximum. They will be advised to clean behind themselves (education), and a company with responsibility to clean flats after people move will check the place and clean it additionally if it is needed. It would be some people's job, and they would be paid for it. Booking will be used for flats, houses, hotels, restaurants, planes, boats and maybe some other things if needed. There will be a company responsible for region/town plan regarding buildings, houses, hotels, train rails and other architectural elements.

11.)
Who owns villas, houses, flats in buildings, rooms, weekend cottages and how to buy them?
No need to buy them, just book them. Software won't allow booking of multiple places at the same time because noone can be at multiple places at the same time. If someone really likes some place that is already taken he can negotiate with people who live at that place and suggest them some other place. There will be a company which helps people to move, they would help carrying furniture to another place. There will be a company which will do cleaning of rooms after people leave some place and go somewhere else. Hotels will have people who would keep the place in order (bosanski: održavanje) regularly.

12.)
Leaders would be people who lead companies, organize people, make rules for workers based on common monotheistic principles and science. They will be well educated because they will need to pass a serious entry exam for that position, and they will need to be better than other applicants for the given position.

13.)
Leaders will be company leaders with responsibilities for a region (region leaders) or town (town leaders). They need to pass and be best at an exam: 60% religion, 40% profession. Mostly leaders are expected to be both: smart and intelligent. Being smart would mean to have knowledge about their monotheistic

religion, have very strong religion beliefs, and very pure intentions (wanting to do good deeds in the Name of the One and Only God). Leaders would be allowed to have as many kids as they want, and would be able to apply for that job position when they are >= 20 years old. Leaders are chosen every 6 years. People who can participate in that exam will need to have roots in that region/town for at least 3 generations (2 past generations plus the current one). Agents will not be able to participate in that exam. Agents are people that are sent from other regions/towns that will have task to keep an eye on people's activities in other regions/towns. Agents will have to be registered so that region leaders and town leaders know that they are present. They will have access to enter companies, ask questions, get some reports from leaders about current activites in the region/town, and they will send reports to region/town leader who sent them. If a man is an agent, his wife(s) will also have to be agent(s), because they would have to move almost every 6 years to other regions/towns. Agents' wife(s) and that agent will be allowed to have up to as many children as those children would have parents. If people in marriage decide to stop being agents, they don't have to devorce, they can just stop being agents and get another job in any region where they would be allowed to stay. Agents who have more kids than allowed will not be allowed to be agents anymore. It will not be allowed that number of agents exceeds 4% of region's/town's population. Region/town to which agents will go and live will be chosen randomly and that will happen every 6 years. So every 6 years agents are being randomly distributed around the world. Lowest number of agents in every region/town would be 1.65% of population that lives there. Agents would be allowed to have PTO (paid time off) in duration of up to 3 months in a year, not more. Region leader and town leaders will decide how many people will work for each company (there will be some minimums). They will publish those lists every year, assign salaries accordingly, as well as number of months per year that those people will have to work (6 to 11 months per year). The rest of the year will be paid as PTO (paid time off). That will happen each year, and it will make it possible to make people work more on jobs that are more needed in current year and given town.

14.)
There would be a president of the world who would have responsibility to watch over all regions by checking reports from his agents (there would be up to 0.5% of them in each region/town) and from leaders. The president would be able to lessen period between exam(s) by which leader of that region/town is selected, from 6 to 3 years and forbid him to apply next time. All people from every region in the world would vote if they actually want president of the world to have jurisdiction over their region, and that voting would happen every 12 years at the time of exam by which leaders are selected, and aligned with time of voting in other regions. Exams by which leader of that region is elected and voting of people regarding jurisdiction of president of the world for their region would be held within time period of 2 weeks. President of the world would be chosen randomly every 6 years, chosen among region leaders whose people chose/voted for jurisdiction of president of the world regarding their region.

15.)
People who move to another region/town need to check in to let know authorities that they are living there, and they need to check in within first month of staying there. Not checking in on time would be punishable by law (fee).

16.)
Standardized cameras will be on as many places as possible (outside and inside) and people will know that they are being monitored. Leaders, agents and police (including detectives) will have access to all cameras in the whole world. Within police there will be department of judge(s) and detectives. Detectives' job will be keeping eyes on monitors and creating reports for their town. Leaders, agents and police (including detectives) will have access to those reports. People will be taught during education not to damage

cameras and even clean them. If they do damage them intentionally, they will have to pay punishment fee or even go to prison for some time. People will know that cameras are there to help them so that they can not be accused for anything without evidence. If there is a case for police, citizens will notify police and police will be able to check cameras and find out what really happened. Standardized cameras will be monitoring all interior spaces, streets, squares, and as many other places as possible.

17.)
There will not be many companies, but those that will exist will be organized in a similar way in the whole world and follow strict baseline rules. What is very important is that noone will be able to develope microprocessors nor microcontrollers if he/she does not work for the hardware company, and noone will be able to publish or install software that hasn't passed all 1000 reviewers. This is to make sure that noone develops any weapons. The process needed for safe development of software is also described in this paper.

18.)
Migration of people will also be regulated via education. They will be adviced to stay in town/region where they were born, unless if they want to be agents. To control number of people and allowed number of children, there would be 2 periods that would repeat one after the other:
- Period A: period of lessening number of people, and
- Period B: period of increasing number of people

During both periods: A and B, region leaders would be allowed to make as many children as they want. During both periods: A and B, agents' wife(s) and that agent will be allowed to have up to as many children as those children would have parents. During period A most people would be allowed to make and have up to 1 child, but muslims who have 3 or 4 wifes would be allowed to make and have up to 2 children. If people already have that many, or more, it’s fine (no children would be taken away from their parents, of course). During period B, people would be allowed to make and have as many kids as those kids would have parents, plus one. Depending on number of people who would have less kids than the allowed number (not counting leaders), some other people would be allowed to apply and be randomly chosen to be allowed to make and have symetrically equal additional number of kids. Regions would be lessening number of people in the way described in this paragraph until number of people in that region is at 97% of number of people that would live in that region in case of scaling number of people in the world from current number to 8*10^9, taking into account that scaling would be done with an equal rate in all regions. Once when number of people in region is decreased to 97%, regions would be increasing number of people in the way described in this paragraph until number of people in that region is at 103% of number of people that would live in that region in case of scaling number of people in the world from current number to 8*10^9, taking into account that scaling would be done with an equal rate in all regions.

19.)
During periods of increase of number of people (periods B) it would be allowed for immigrants to come in, however not more than 1.2% of scaled number of people in each town. Immigrants are people who live there 6 months or more, and less than 8 years. They don't have family roots at that place for 3 generations (2 past generations plus the current one), so they can not apply to be leaders. Leaders will be able to modify salary, number of working months (6 to 11) per year for each immigrant if they think it's needed, in order to make them work more. Leaders will be allowed to also limit the number of kids that immigrants can have, but not to less than 1 (2 in case of muslims who have 3 or 4 wifes). This will allow leaders to control immigration.

20.)

Muslims will be able to pay zekat by working in a slaughterhouse or some other food production factory 1 month in a year in the name of the One and Only God Allah dž.š., and also will be able to perform Hajj (bosanski: Hadž). If there are too many people applying for Hajj and some muslims can not perform Hajj during their life because of that, their intention would be counted as they performed Hajj if they applied regularily. Muslims pay for Hajj only if they are chosen to go.

21.)
People would not be forced to work just for the sake of working, but only when there is really something to work on. People will be able to choose 2 free days in a week taking into account following days: Friday, Saturday or Sunday. Working time per working day will not be allowed to exceed 8 hours. There will be no inflation. Allowed salary ranges for all job positions will be same for the whole world and determined at the highest level by agreement of region leaders every year. Also, it will be last task region leaders will need to do before than exam for next region leaders is held.

22.)
There will be first class for ambulance, police, or leaders in vehicles such as boats, planes, helicopters. They will be able to have precedence on train intersections and option to make train go faster. They would have option on phone to activate those modes. In mode when higher speed is activated, every train on the path to given destination becomes faster, while on intersections N trains moving along that path would be able to pass intersection before than a single train with normal mode is allowed to cross it.

23.)
There are sacred places on Earth:
- for muslims: Mekka (in Saudi Arabia), Medina (in Saudi Arabia), Al-Aqsa (Jerusalem, in Palestine).
- for christians: Vatican.
- for jews: some places in Israel.

- Russia has right to have territory with similar rules as for sacred places of size of 1/6 of its current territory.

All sacred places are allowed to treat other religions members as immigrants (not counting agents), and number of those people can not lessen native/original religious population to less than 85%.

Nations came to an agreement that will stop wars in the world and enable a happy and pleasant atmosphere. Also, stop wars in Ukraine and Gaza so that people can return to their homes and everyone can live happy (and more religious) life in piece.

2 key questions resolved:
1. It will be allowed, despite sheriath law to have other religions build new religious objects, keeping old ones is fine anyway. (It is a compromise, except in Saudi Arabia, Italy, Israel, Palestine)
2. It is allowed according to sheriath law to make a contract and limit specific regions so that there is only 1 religion (approximately) in that region, and that is in regards to Saudi Arabia, Italy, Israel, Palestine, however taking into account that in Israel it will be allowed to have up to 18.3% of muslims, and in Palestine's West Coast up to 15% of jews.

WE HAVE A FINAL SOLUTION TO WORLD PROBLEMS,

I just need to finish writing that paper actually, but most of ideas are totally acceptable.

Creation of weapons within any region/town in the whole world is not allowed, and will be stopped by actions of other regions.

24.)
Golan area is part of a Syrian region. Palestine consists of Gaza and West Bank, just like in the beginning of year 1967. Palestine is a separate region that has nothing to do with Israel.

25.)
People of former Yugoslavia spoke and speak the same language, and it will be called vernacular language (na našem jeziku: narodni jezik). It has multiple dialects and subdialects. In Bosnia and Herzegovina some people call it Bosnian language, some people call it Croatian language and some people call it Serbian language. Regarding school language subject names and documents, it is necessary to write name of that language exactly as people, owners of document, want it to be written. For example: ”narodni jezik - bosanski”, or “narodni jezik - hrvatski", or “narodni jezik - srpski", or “narodni jezik - crnogorski", or “narodni jezik - kosovski". Bosnia and Herzegovina will be one region (there will be no entities), however borders of towns will not change current entities' edges. Names of the following towns in current entity "Republika Srpska" will be changed to their previous names:
"Gradiška" will be changed back to its previous name: "Bosanska Gradiška",
"Brod" will be changed back to its previous name: "Bosanski Brod",
previous name of "Kneževo" is "Skender Vakuf", so that town would be called: Skender Vakuf - Kneževo, which means it will have like 2 names, similarly like Gornji Vakuf - Uskoplje.

26.)
Regions would be devided into towns and there would be no need for any of useless politics that currently can be observed in the world. So, someone might ask: what would keep together current countries that are bigger than Bosnia and Herzegovina? The answer is:
- special relations regarding trading
- language, in most of cases
- history in school books
- names of those regions will contain base country’s name.

27.)
This note/paragraph (narodni jezik: crtica) does not apply to protected sacred regions (regions within countries that contain sacred places). Regarding other regions, it would be allowed for more immigrants to move into a region if that region's leader agrees, and >=85% of other regions' leaders approve it, but region leader would need to have approval of all town leaders within his region to be able to suggest such plan to other region leaders for voting. This would increase number of people in regions where immigrants are settling in, but decrease number of people in regions from which those immigrants come.

28.)
This note/paragraph (narodni jezik: crtica) does not apply to protected sacred regions (regions within countries that contain sacred places). If there is plotting that is against general world guidelines, there would be voting and if 85% of region leaders agree, then part of population of the problematic region would be randomly displaced in other regions (40% of population of that region). Other people from other regions would apply and be randomly chosen to move into that region and take place of people who move out.

29.)
We are forbidding trade of organs. It is allowed to give your organ (or part of it) only to someone who is very dear to you, and only if it does not endanger your life nor make It much harder. They could ask you without nanotechnology, and you would have time to think and make decision to help them or not. We are forbidding use of artificial intelligence and nanotechnology. We labor for simplicity in technology. We are getting rid of wars. Note that World War 2 (1941 - 1945) could have been Armageddon announced in monotheistic Holy Books, since 35 up to 85 million of people were killed. Generally, it is allowed to defend yourselves in case of war and defeat enemy(ies). In case if someone hurts someone else clearly intentionally (except in case of defending), punishment by law will be very strict and involve long staying in prison.

30.)
Punishment for proven fornication would be: one hundred lashes. This is what Holy Books say regarding fornication:

Qur'an-i Kerim: "'They are' those who do not invoke any other god besides Allah, nor take a 'human' life made sacred by Allah except with 'legal' right, nor commit fornication. And whoever does 'any of' this will face the penalty. Their punishment will be multiplied on the Day of Judgment, and they will remain in it forever, in disgrace. As for those who repent, believe, and do good deeds, they are the ones whose evil deeds Allah will change into good deeds. For Allah is All-Forgiving, Most Merciful." (El-Furkan, 68, 69, 70)
"The faces of fornicators will blaze with fire", said Muhammed s.a.v.s. according to hadith.
"Iman leaves a man at the moment of committing fornication and returns to him only when he is done with that act", said Muhammed s.a.v.s. according to hadith.

The spiritual consequences of fornication are addressed in 1 Corinthians 6:9-10 (Bible): "Do you not know that the unrighteous will not inherit the kingdom of God? Do not be deceived. Neither fornicators, nor idolaters, nor adulterers, nor homosexuals, nor sodomites, nor thieves, nor covetous, nor drunkards, nor revilers, nor extortioners."
In the case of a man who has sexual relationship with a betrothed woman, both the man and woman are to be stoned to death, as described in Deuteronomy 22:23-24: "If a young woman who is a virgin is betrothed to a husband, and a man finds her in the city and lies with her, then you shall bring them both out to the gate of that city, and you shall stone them to death with stone."
Deuteronomy 22:20-21 prescribes the following punishment for a woman found not to be a virgin on her wedding night: "But if the thing is true, and evidences of virginity are not found for the young woman, then they shall bring out the young woman to the door of her father's house, and the men of her city shall stone her to death with stone".
(New Testament) In John 8:3-11, we find the well-known story of the woman caught in adultery. The scribes and Pharisees brought her before Jesus, expecting Him to uphold the punishment prescribed in the Old Testament. Instead, Jesus challenged them, saying: He who is without sin among you, let him throw a stone at her first. This profound statement highlights the reality that we all have sinned and are in need of God's mercy. Jesus then forgave the woman, instructing her to "go and sin no more".

31.)
Cloning and genetical engineering of living beings and viruses is forbidden and punishable by law.

32.)

Arabic language would be 1st language for muslims. English would be 2nd language. 3rd language would be region or country specific. One of languages taught at schools would be English for all people in the world, since it's so easy to learn and enables communication.

33.)
Interest rate regarding money (clearly prohibited in Quran) can be understood as perpetuum mobile for enslaving countries and people. Almost all countires currently owe money to others and their debt is rising. It is an unstable system. Interest rate will be forbidden and punishable by law. Also remember that it will not be possible to give money to anyone (you can just spend money on something, you can not give it to others).

34.)
Authism is not an illness.

35.)
List of important world companies (there would be one for each of the following):
- Production and use of standardized aeroplanes (3 sizes), hellicopters (2 sizes), boats, underwater vehicles that can not be remotely controlled,
- Standardized software production,
- Production of documentaries, movies, cartoons with clear educational ideas,
- Theatres,
- Laptop and phone games based on religion principles, delivering clear educational messages to players,
- Religion officials (such as hodjas - bosanski: hodže, muezzins, priests etc.),
- Electricity production based on pools at seas and oceans,
- Transport based on small trains for up to 6 passengers,
- Agents,
- Leaders,
- Police (including detectives),
- Teachers (teaching based on religion and science),
- Sport,
- Cleaning of cities and flats,
- Helping people move to other flats/houses - carrying furniture,
- Restaurants,
- Food production based on islamic rules (should be mostly automated),
- Veterinary stations where animals such as cats or dogs and some other will be able to get medical care and live. Their reproducton will be regulated by putting males and females in separate spaces,
- Castration nor hurting of animals is not allowed,
- Animals can be killed only for food and according to religion based regulations for the slaughter.

36.)
Punishments are executed by law.

37.)
It is not allowed to manufacture, sell, buy nor eat pork in monotheistic religions anywhere in the world. If there is evidence of manufacturing, persons responsible for that would be punished with 1 year in prison. Soaps made of swine(s) must be clearly marked as such with same sign of 1 cm width and height. Noone would be able to take any money from anyone in this system, so there would be no any reason to spread

hatred or attempt to sell them to people who would not want to use them because of what they are made of.

38.)
Alcoholic drinks or drugs that could make you dizzy must be clearly marked with same sign, red X mark, of 1 cm width and height everywhere in the world, because they are not allowed to muslims and also it is not allowed to christians and jews to get drunk because it is considered to be a sin. Prayers of muslims who would intentionally drink/eat those marked drinks or drugs would not be accepted for 40 days. The Last Messenger of Allah swt., Muhammed s.a.v.s. said: "Whoever drinks wine, his prayer is not accepted from him for 40 days. If he repents, Allah forgives him...” [Tirmidhi]

39.) Homosexuality is punishable by death by stoning, and people will be well educated about it. There will be cameras all around to proof it.

40.) Change of gender is not possible and is punishable by death of the one who performed it and also of the one who agreed to it, if that act is performed.

41.) Plotting to spread sins is punishable by law. There will be cameras all around to proof it.

42.) If you are married, having sexual relationship with anyone other than the person you are married to is punishable by death of those who performed it, except of those who were forced to do it (in such case those who forced him/her/them to have sexual relationship will be punished by death). There will be cameras all around to proof it.
43.) However religion teachers and professors should advice pupils and students to get married and have as many kids as allowed.

44.) If there are not enough pupils / students who belong to a particular monotheistic religion for a teacher, it would be allowed for them to attend religious classes online.

45.) Pills, drugs, castration and other similar methods used with intention to lessen number of people are prohibited, not allowed by law, punishable severely (either by death or by long staying in prison, more than 10 years.

46.) Doctors will provide risk factors regarding prescribed medication or medical procedure so that people can choose whether to accept those risks or accept risk factors/consequences of not taking the medication or/and medical procedure.

47.) Single worldwide company allowed to develope mashines and hardware in a strongly regulated manner.

48.) Single company allowed to produce software in a strongly regulated manner:
- many people will need to check written source code and help improve it and they will see each other's comments
- each of them will be able to add a suggestion for improvement, other people can comment it
- programmer(s) will need to check and resolve conversations with each reviewer
- there will be 500 reviewers from related software category(ies) to which the software belongs, and they will stay reviewers until the software is considered completed

- if some programmer(s) detect bug(s) in a software, they can update that project but the new software version will not be published until all conversations with reviewers are marked as complete, they will have source code and detailed documentation available.
- each conversation needs to be resolved and will be assigned a limited period of time. If it's not resolved within it, then all reviewers will be judges and vote who is right, or vote to delete whole conversation along with other people's comments
- if you are not right, you get a negative point, if you have more than 100 negative points you lose your job.
- if it's decided that conversation needs to be removed, it's not counted as negative point
- if anyone notices any names or coded messages in any comment, they mark it and all reviewers along with programmer(s) vote and in 2 days if there are more votes for deletion, the comment is removed and writer of comment gets a negative message. Programmer(s) can stop or reset time to implement suggestion/improvement/idea, create a branch and attach it at conversation as proof
- programmer(s) and reviewer will need to confirm that the conversation is resolved, after that it is marked as resolved
- all conversations need to be resolved to allow software to be published
- programmer(s) can mark their work as either a project phase or completed software
- if it's marked as completed software, reviewers need to confirm that it really can be used as completed software and that it is not just a stage (project phase).
- programmer(s) will be able to see each other's names, but reviewers will have to be anonymous.
- reviewers will see programmer(s)' names as numbers.
- programmer(s) notify same set of reviewers only after they implement whole code, and/or after all conversations are closed.
- education will play very important part in the training of programmers
- programmer(s) will need to follow strict coding rules and describe their project ideas and code with appropriate documentation that will also be available to reviewers so that they can get a better idea about what is being implemented
- stages of software project should be small.
- standardize laptops, phones, monitors
- make it impossible to install applications that are not published and haven't passed all reviews
- make it impossible to install software in any other way (except OS), and forbid flashing of microprocessor / there will be no tools that would allow it, and even if there were, OS will be able to detect it and prevent it.
- it won't be possible to publish software if you are not working for that software company and haven't passed rigorous training (specialization) in regards to writing detailed and simple documentation and simple code
- Satellites code will be developed in a similar manner, and they can be used for navigation or religion/science research
- Drones are not allowed. Underwater vehicles, boats, hellicopters and aeroplanes are allowed but will be standardized and produced in a strongly regulated manner.

49.) Animals should be killed only for food and according to religion based regulations for the slaughter. It is impermissible for a muslim to eat meat of animals slaughtered by atheists, polytheists, confusionists who don't believe in the One and Only God, people who believe some creation of the One and Only God is a god. In order to make the system work without unnecessary problems so that all monotheists can feel free to eat food, there will be the following rules:

* it is not allowed to torture animals during their life before slaughtering
* animals will need to have enough food, drink and space during their life

* it is not allowed to sharpen a knife in front of animals nor slaughter animals in front of other animals
* it is very important to say the following words before slaughtering: "In the Name of the One and Only God", or "Bismillahi Rahmani Rahim"
* it is forbidden to eat animals that you find dead somewhere
* it is forbidden to produce, sell, buy and eat pork according to all monotheistic religions

50.) Food reserves need to be optimized so that there is as little vaste as possible, and taking into account number of sellings.

51.) There should be an app that shows all ingredients of all products plus additional information when it's needed.

52.) Education will be based on religion, people will be informed about proofs and facts regarding the One and Only God's existance.

53.) People will be considered adults when they are 17 years old.

- Monotheism

Numbers 23:19 (Bible) begins "God is not man, that he should lie, or a son of man, that he should change his mind. Has he said, and will he not do it? Or has he spoken, and will he not fulfill it?"

Islamic teachers in schools will teach that there was a misunderstanding in christianity, and Christian teachers (montheists) should do the same or devote a lecture(s) to talk about it and mention a very high possibility that that happened. In principle Christians are also monotheists and most of them believe that there is One and Only God, the Creator that created everything that exists (La Illahe Illellah - nema drugog Boga osim Allaha. The word 'Allah' means 'God' in Arabic language). Isa a.s. - Isus was created (bosanski: stvoren) in his mother's (Merjem - Maria) womb by decision of the One and Only God.

Everyone (and everything else) was also created by the One and Only God, but that does not mean that humans are children of the One and Only God.

Adem a.s. - Adam, the first man on Earth, was also created by the One and Only God in his adult form and he is not a son of the One and Only God.

Isa a.s. - Isus never told anyone to worship him, he was guiding people to believe and worship the One and Only God. However, there is a possibility that Isa a.s. - Isus reffered to the One and Only God with the word: "Father", and if he really did that, it was a limitation of language of that time, he actually meant to say: Creator. This is very important for them (Christians) to understand and drastically increases their chances to succeed and be in Džennet - Heaven if they do more good than bad deeds. Check one of the most famous prayers that starts with "Our Father" (or the most famous prayer) in christianity and think about its meaning, that will proof it. "Our" would mean that there are more people that would be sons of God, however we know that is not true. In that prayer Isa a.s. - Isus confirms that The One and Only God's will is being executed in/on both: heavens and earth and Isa a.s. - Isus prays to the One and Only God for food and also for protection from evil. Why would he do that if he was a god? According to islam, human is on Earth as the

One and Only God's lieutenant, which means that he has responsibility to spread justice, to establish order and do other good deeds in the name of
the One and Only God (Allah dž.š.). Christians also believe that there were messengers of the One and Only God even before Isus - Isa a.s., like:
Nuh a.s. - Noah (ark), Muusa a.s. - Moses who lived at the time when pharaoh was in Egypt, Ibrahim a.s. - Abraham, his son Ismail a.s. - Ishmael,
Sulejman a.s. - Solomon, Jacub a.s. - Jacob, Lut a.s. - Lot, Adem a.s. - Adam the first man on Earth, Davud a.s. - David and maybe others.

Qur'an-i Kerim (Holy Book that was revealed to the last Messenger of the One and Only God, Muhammed a.s.) confirms that 4 Holy Books were revealed to
messengers of the One and Only God: Tevrat (Tora - Holy Book of jews), Zebur, Indžil (the Gospel, Evandelje), Qur'an-i Kerim
Tevrat je objavljen Allahovom poslaniku Musau, alejhis-selam:
"Mi smo objavili Tevrat, u kome je uputstvo i svjetlo. Po njemu su Jevrejima sudili vjerovjesnici, koji su bili Allahu poslušni i cestiti ljudi, i uceni,
od kojih je traženo da cuvaju Allahovu knjigu, i oni su nad njom bdjeli." (El-Maide, 44)
Zebur je objavljen Allahovom poslaniku Davudu a.s.:
"... a Davudu smo dali Zebur." (En-Nisa, 163)
Indžil je objavljen Allahovom poslaniku Isau a.s. "Poslije njih smo Isaa, sina Merjemina, poslali, koji je priznavao Tevrat prije njega objavljen, a njemu
smo dali Indžil, u kome je bilo uputstvo i svjetlo, i da potvrdi Tevrat, prije njega objavljen, u kome je takode bilo uputstvo i pouka onima koji su se
Allaha bojali." (El-Maide, 46)
Kur'an objavljen posljednjem Poslaniku Muhammedu sallallahu alejhi ve sellem:
Uzvišeni Allah dž.š. je rekao:
"A tebi objavljujemo Knjigu, samu istinu, da potvrdi knjige prije nje objavljene i da nad njima bdi. I ti im sudi prema onome što Allah objavljuje i ne povodi
se za prohtjevima njihovim, i ne odstupaj od Istine koja ti dolazi; svima vama smo zakon i pravac propisali." (El-Maide, 48)

The Bible is very clear about making images of God - it is forbidden.
Exodus 20:4 "You shall not make for yourself an idol in the form of anything in heaven above or on the earth beneath or in the waters below."
Matthew Henry: "The second commandment refers to the worship we are to render to the Lord our God. It is forbidden to make any image or picture of the
Deity, in any form, or for any purpose; or to worship any creature, image, or picture." http://www.christnotes.org/commentary.php?b=2&c=20&com=mhc

Regarding homosexuality (both: male and female), it is prohibited in Bible, also in Qur'an-i Kerim. Check this link:
https://www.openbible.info/topics/homo_sexuality
Lut a.s. - Lot, a Messenger of the One and Only God, is mentioned in Holy Books and sinners who performed that sin were burried, punished by the One and Only
God.

There are only 2 genders: male and female, and when someone is born as either male or female, his/her gender can not be changed ever. People who think differently

should use their mind and realise the truth. If someone tries something like that, it would be hurting himself and would be a great sin, similar to fornication.
Damage would be irreparable. Doctors would not be allowed by law to do such operation/damage and would be punished.

Certain paragraphs in the Bible, especially in the Old Testament, specifically mention eating pork as an abomination that believers need to stay away from.
In Holy Qur'an the One and Only God prohibits us to eat blood, carrion (bosanski: strvina), pork.

According to BibleEtanol and other things that make you drunk/dizzy are forbidden in Bible, and islamic hadiths. Etanol is not allowed to be used even in medicine for muslims.

Theft (stealing) over a given amount, not foodstuffs during a famine, is punished by amputation of the hand. (stealing) is punished by the amputation of the
offender's right hand, and armed robbery may be punished by execution (it depends if it results in hurting or killing someone). Qur'an-i Kerim (muslim's Holy Book):
"As for male and female thieves, cut off their hands for what they have done, a deterrent from Allah. And Allah is Almighty, All-Wise."

Having more than 1 wife is not mentioned as a sin in Bible. Some messengers of the One and Only God who lived before Isa a.s. - Isus had more than 1 wife:
Ibrahim a.s. - Abraham, Jakub a.s. - Jacob, Davud a.s. - David, Sulejman a.s. - Solomon.
https://en.wikipedia.org/wiki/polygamy_in_christianity
Islamic hadiths allow male adults to have 1 - 4 wifes, but there are stricter conditions and rules in cases of having more than 1 wife:
need to treat them quite equally, they need to agree, women need to treat each other as sisters in faith, they need to have enough for living.

There is zero point in thinking that something that happened should have happened in any other way than it happened. Because the One and Only God decided everything that ever happened and that will happen, including the current moment. It is called Kader in islam.

There is zero point (no reason at all) to have any wars between people.
